Attention Buyers and Sellers! Keep up with today's market information. It does not matter if you are thinking of selling or buying real estate today or in the near future, the more informed you are, the better position you will be in. Knowledge is Power! I am able to automatically email you information on the properties that you are interested in, as soon as they become available.

If you are a Seller, it is good to know what is happening in your neighborhood, such as what properties are available for sale and what has sold. If you are a Buyer, the same is true. You may want to know what is available in a certain neighborhood, and/or a certain price range, and/or so many bedrooms/baths? All you need to do is let me know what you are interested in.

A few examples might be:

- You might be interested in properties on Hamlin Lake-----you will automatically receive listings of these properties as they become available.
- You might be interested in properties in the City of Ludington, priced between \$80,000.00 to \$130,000.00 with at least 3 bedrooms---- you will automatically receive listings of these properties as they become available.
- You might be interested in farms in the area that have at least 20 acres and priced between \$150,000.00 to \$300,000.00 ---- you will automatically receive listings of these properties as they become available.
- You may be looking for a condominium or a home on Lake Michigan----- you will automatically receive listings of these properties as they become available.

I have a lot of folks just like you that are already enjoying this service. All you need to do is fill out my [Dream Home Finder](#) form so that I have your search criteria or you can email me at tom@tomblough.com.

There is absolutely no charge for any of this. I do hope that you will call on me for your real estate purchases and sales, as that is how I am paid. Always know that this is my personal business website, I do not sell or give your information to anyone. If you find that you want to be taken off my email lists, just let me know.
